Electrical Engineer

Bermuda Electric Light Company Limited (BELCO) is pleased to invite applications for Electrical Engineer reporting directly to Vice President, Energy Delivery in the Operations Group.

Job Description: Responsible for assisting in the design and costing of high voltage transmission developments, as well as technical analyses to ensure ongoing system security. This position also provides advice and technical support on engineering-related issues as requested, manages assigned engineering projects and participates in the technical aspects of key Company projects. This position is also required to liaise with internal and external customers, other engineering professionals and external consultants or vendors to discuss and resolve engineering issues or problems.

Education and Experience Requirements:

- A recognized University degree from an accredited programme in electrical engineering as well as Professional or Chartered Engineering status is preferred
- Minimum 10 years in a related field of electrical power engineering; five of those years at a responsible level
- Preference given to candidates with design experience involving transmission and distribution related capital projects, including system protection, control and metering
- Must be prepared to adhere to the ethical standards required by the Professional Engineers Registration Act of Bermuda.
- Must be value-centred with high integrity
- Self-motivated
- Team player

Please apply in writing by Wednesday, August 25 to:
