## Engineering Technician

Bermuda Electric Light Company Limited (BELCO) is pleased to invite applications for Engineering Technician reporting directly to the Electrical Engineer in the Energy Delivery, Operations Group.

### Job Description:

Responsible for several aspects of construction, operations and maintenance associated with the transmission and distribution system. In addition to technical duties, the successful candidate will be involved in coordinating and managing teams of specialists and administering performance appraisals and monitoring budgets. The focus will be on the optimization of all transmission and distribution assets to key stakeholders and customers. The candidate must also demonstrate a strong appreciation for the health, safety and environment aspects of the utility industry.

### Education and Experience Requirements:

National Certificate (ONC) or equivalent and working towards a professional engineering designation such as EngTech or IEng. A minimum of 10 years in the field of electrical power engineering, preferably with an electric utility with a minimum of 3 years of operational experience with some supervisory experience.

Proven organizational and supervisory skills and the ability to respond effectively to a diverse range of assigned responsibilities. Excellent analytical and decision-making skills together with exemplary relationship-building ability and commitment to both individual and team development. Excellent communications skills and dedication to the highest standards of customer service. Candidates must be safety conscious, accountable and dependable. Accuracy and attention to details are imperative.

Please apply in writing by Wednesday, August 25 to:
